

*robotic* PRECISION. *human* TOUCH.

**Advancing recoveries with minimally-invasive  
robotic surgery since 2005.**

Through a synergy of science, expertise and personal attention, our goal is to return our patients to health and their active lives sooner. That's why we were the first in the area to introduce the robotic da Vinci Surgical System.

With the unprecedented precision and small incisions of robotic surgery, patients benefit from fewer complications, short hospital stays and fast recoveries.

While robotic surgery happens here at Pomona Valley Hospital every day, we still share our patients' awe at their remarkable recoveries.
